## About:

UniCat is a community driven and transparent Cryptocurrency meme-coin that aims to unite all cat lovers in the world to join us on the journey to outer space.

**“United we stand, divided we fall!”**

They say every dog gets his day, and they indeed had theirs. It is time for the cats to take over and cat season is here to stay. Let's unify the world dominating wrath of the cats and march on our mission to be the first Cat Coin on CoinMarketCap's top 100!

You heard us! We hereby challenge all other Cat Coins to a race to the top!

**IT'S ON!**

*“Inspired by where it all begins, on Uniswap.”*

**Team:**

The founders are four friends from **Iceland** who have been aiming to create something truly great together. At last, they did and they are here to stay!

Three of them have majored in **International Business Economics** and **Marketing**, while the Developer has a masters degree in **Computer Science** and is an experienced programmer who has a background in Solidity development, Crypto Mining and Consulting.

This quartet's sole purpose is to bring this cat to the Top 100 list of CoinMarketCap. They build the project to be 100% community driven for later.

**The community wants it?  
The community gets it.**

# Smart Contract Security Audit

## Utility:

UniCat team will develop series of **NFTs** with various rarities and functions. Additionally there will be free mint for holders, which will increase in mints overtime with more and more holders.

UniCat also plans to become the next Swap! **CatSwap** exchange will be an Automated Market Maker (AMM). This is a type of decentralized exchange that offers only Animal pairs of tokens to trade. Prices are set using mathematical formulas, and trades occur using smart contracts. For this to work, the exchange will create liquidity pools.

In the future UniCat Token will have the option to pay out fees that user have to pay to swap tokens. So if the people decide and vote for it, then it becomes something like a dividend "stock", instead of getting paid by a company, you would get paid by the decentralized application, called dApp.

If this occurs, then the value of the token will be even higher. The more you own the higher your share of the fees will be. It becomes passive income at one point.
